maryelinram@gmail.com

I'm a software engineer with extensive experience across diverse technologies. Passionate about continuous learning and crafting seamless digital experiences and high-quality applications. My attention to detail and problem-solving skills help me tackle challenges and drive innovation.

Skills

JavaScript | TypeScript | Node.js | C# | Python

Angular | gRPC | Next.js | NestJS | React | .NetCore | ASP.NET

Docker | Git | Kafka | RabbitMQ | SQL | HTML/CSS | Sass | Figma

Microservices | Event Driven Architecture

AWS | Google Cloud | Supabase

Experience

Senior Software Engineer - BairesDev

- Collaborated with cross-functional teams to deliver high-quality software, and contributed to architecture decisions, code reviews, and best practices to improve application performance, reliability, and maintainability.
- Supported the development and maintenance of features across multiple client platforms.
- Stack: Next.js, React, Node.js, TypeScript, NestJS, Docker, MongoDB.

Senior Software Engineer - Newtech

- Supported and enhanced features for a large-scale enterprise operating in the hosting and web services industry.
- Designed and developed reusable custom web components used across the company's digital ecosystem.
- Mentored fellow developers on modern front-end best practices, code quality standards, and CI/CD workflows.
- Stack: React, TypeScript, Sass, Angular.

Senior Software Developer - Solvex Dominicana

- Developed enterprise solutions using React, Redux, and TypeScript, enhancing user experience.
- Designed Node.js back-end services with RESTful APIs and GraphQL endpoints, enabling seamless integration between internal and third-party systems.
- Implemented real-time features with WebSockets for data-driven dashboards.
- Optimized database interactions with PostgreSQL and MongoDB, improving query efficiency and reducing load times.
- Mentored junior developers on modern front-end practices, code quality, and CI/CD pipelines.
- Contributed to the adoption of Agile and DevOps practices, including GitHub Actions pipelines and Docker-based deployments.
- Stack: React, Next.js, Vue.js, Sass, NestJS, Docker, AKS, Azure B2C, PostgreSQL.

Senior Software Engineer - Freelance

- Delivered full-stack projects for clients using React, Next.js, TypeScript, and Node.js, with a focus on performance, scalability, and maintainability.
- Built RESTful APIs and integrated them with front-end clients, improving data fetching efficiency.
- Architected and deployed serverless solutions on cloud environments, reducing infrastructure costs for clients.
- Customized eCommerce platforms and SaaS applications tailored to business needs.
- Managed client communications, project scoping, and end-to-end delivery, ensuring on-time completion and exceeding expectations.
- Stack: React, Next.js, TypeScript, Node.js, NestJS, Vue.js, Angular, Docker, Github Actions, Shopify, PostgreSQL, MongoDB.
